Workshop Description

Neuroscience for Learning

A Workshop for Any Student, Parent, or Teacher

Though academic learning usually occurs in the brain, teachers usually aren't required to learn anything about how this crucial organ functions and prospers. As a result, students miss important opportunity to maximize their intellectual potential. In this workshop, veteran educator and President of **Crimson Coaching™**, Dr. P. (Dominique Padurano, Ph.D.) shares basic principles about how the brain works and simple protocols to turbo-charge how your brain learns. Perfect for students in grades 6 to adult and for parents and teachers of all aged children.

Dr. P.'s Bio

After teaching for more than a decade at some of the nation's top high schools, Dominique Padurano, Ph.D. ("Dr. P.") founded Crimson Coaching, a boutique tutoring, test prep, and college counseling consultancy. A self-confessed "lifelong learner," Dr. P. earned her own Bachelor's degree, *magna cum laude*, from Harvard College, possesses a Master's in Education and a Ph.D. in History, and loves reading about the brain. She works with clients worldwide and may be contacted directly at info@crimsoncoaching.com.
